GOPALAKRISHNAN PALANISAMY

Software Development Engineer in Test (SDET)

(+91) 97901-53971 | gpalanisamy526@gmail.com | Bengaluru, Karnataka, India | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Results-driven SDET with 6+ years of experience designing and implementing scalable test automation frameworks for Web, Mobile (Android/iOS & mSite), and API layers. Expert in Selenium WebDriver, Appium, Java, Python, and Rest Assured with deep knowledge of Page Object Model (POM), Hybrid, and Data-Driven frameworks. Proven track record of reducing manual testing effort by up to 99% through intelligent automation. Experienced in BDD with Cucumber, CI/CD integration (Jenkins/GitHub), cross-browser and cross-platform mobile testing, and Agile/Scrum environments with strong SDLC and STLC practices.

CORE TECHNICAL SKILLS

Languages Java, Python, JavaScript, TypeScript	**Frameworks** TestNG, Cucumber (BDD), POM	**CI/CD & Version Control** Jenkins, Git, GitHub
Test Automation Selenium WebDriver, Playwright, Appium	**API Testing** Postman, Rest Assured	**Defect Tracking** JIRA
Mobile Testing Android, iOS, mSite	**Build Tools** Maven	**Database & Data Validation** SQL, MySQL, Azure Cosmos DB
		Data Streaming Apache Kafka (message validation)

PROFESSIONAL EXPERIENCE

Moolya Software Testing Pvt Ltd — SDET

Bengaluru, India | 2024 – Present

- Designed and implemented scalable test automation frameworks for Web and Flutter-based Android applications using Selenium WebDriver, Appium, and Java, following Page Object Model (POM) architecture and Hybrid framework design patterns.
- Automated 170+ test cases across Web and Mobile platforms using TestNG and Cucumber (BDD), reducing manual testing effort by 65% and significantly accelerating release cycles.
- Engineered an OCR-based automation solution for banner and PLP discount validation — validating product counts, discount ranges, and business rules with automated Excel reporting, cutting manual validation time from 1 week (3 engineers) to under 1 hour (approx. 99% effort reduction).
- Integrated automation suites into Jenkins CI/CD pipelines with GitHub Actions for continuous test execution triggered on every build deployment.
- Led cross-browser and cross-device testing strategies to ensure consistent application functionality across Android, iOS, and mSite platforms.
- Collaborated in Agile/Scrum sprints to define test strategies, perform requirement reviews, and implement shift-left testing practices.

Mobius Knowledge Services — Software Test Engineer

Chennai, India | 2022 – 2024

- Collaborated with development teams in Agile sprints to identify and resolve critical UI and API defects, reducing post-release production issues by 50%.
- Automated 100+ API test scenarios using Postman and Rest Assured, improving API reliability by 20% and increasing overall test execution efficiency by 30%.

- Performed API contract testing, functional validation, negative testing, and regression testing for RESTful services across Dev, QA, and Staging environments.
- Created and maintained comprehensive test documentation including test plans, test cases, and defect reports tracked in JIRA.
- Participated in sprint planning and backlog grooming to ensure testability, adequate test coverage, and quality gate readiness before each release.

OEC Services India Pvt Ltd— Business Intelligence Engineer
Chennai, India | 2022 – 2022

- Validated event-driven data pipelines using Apache Kafka, verifying message payloads, and ensuring successful downstream data persistence in Azure Cosmos DB through ETL data validation.
- Used SQL queries to validate data integrity and record counts.
- Performed API validation and end-to-end data flow verification.

Prodapt Solutions — Software Test Engineer
Chennai, India | 2019 – 2022

- Developed and maintained 150+ automated API test cases using Rest Assured with Java, increasing defect detection rate by 30%, and improving overall regression test coverage.
- Executed functional, integration, regression, negative, and system testing across multiple product releases to ensure stability and quality.
- Managed complete defect lifecycle — logging, tracking, verification, and closure — in JIRA, with timely daily execution reporting.
- Built and maintained a data-driven automation framework enabling parameterized test execution across multiple input datasets.
- Participated actively in SDLC and STLC processes, contributing to test planning, test design, and sign-off for all release milestones.

KEY ACHIEVEMENTS & IMPACT

- Reduced OCR-based manual validation from 1 week (3 engineers) to under 1 hour — achieving approximately 99% effort reduction.
- Automated 170+ Web & Mobile test cases at Moolya, cutting manual testing effort by 65%.
- Reduced post-release production defects by 50% through early-stage API defect detection at Mobius.
- Developed 150+ API automation test cases at Prodapt, improving defect detection rate by 30%.

EDUCATION

Bachelor of Science— Information Technology
AG Arts & Science College | Tirupur, Tamil Nadu, India | 2017

TESTING METHODOLOGIES & PRACTICES

Agile / Scrum • SDLC & STLC • Shift-left Testing • Behavior-Driven Development (BDD) • Data-Driven Testing • Keyword-Driven Testing • Page Object Model (POM) • Hybrid Framework Design • Cross-Browser Testing • Cross-Platform Mobile Testing • Regression Testing • Smoke & Sanity Testing • API Contract Testing • Functional & Integration Testing
